

CNI METAL FABRICATION

Specifications and Features:

- Ⓢ Plasma torch cutting up to 1 1/2" thick.
- Ⓢ Metal welding.
- Ⓢ Sheet metal fabrication.
- Ⓢ Stainless steel, galvanized or cold rolled steel.
- Ⓢ Hydraulic punch press stamping.
- Ⓢ Specializing in custom jobs.
- Ⓢ Nationwide service.

Scope of work:

Custom cutting and fabrication work. You can use your own design and prints (DXF files or CNC programs or we can draw the parts here per your specifications, using our AutoCAD program.

The **RAPTOR** is a Plasma only cutting machine with an extremely rigid gantry design to deliver maximum performance and productivity required for your profile shape cutting requirements. This is an ideal machine for long plates or multiple loaded plates on the table.

It will consistently turn out highly accurate parts with excellent hole and edge quality with the latest HyPerformance and Precision Plasma Systems available today. It's a Conventional Plasma system to cut material up to 1-1/2".

It is configured with the latest technology in PC Based Controls and Drive Systems. Our standard is the Burny Phantom ST PC Based Control designed to handle a Single Torch Plasma Station.

CUTTER SPECS: 8 foot effective cutting width. 12' X 8' water table but we can accomodate longer plate sizes.
